REDAS JEFISOVAS

SKILLS

My web stack typically includes **HTML**, **CSS**, **JavaScript**, **React**, **Node.js**, and **MongoDB**. All the websites I manage are hosted on **GitHub** and automatically updated with each push to the respective master branch. During the planning stage of a project, I use **Figma** and **Affinity Designer** for UI-design and **Trello** for a structured workflow. I'm familiar with **TypeScript** and appreciate its advantages, especially as I've been programming a lot in **C#** recently.

I've experimented with **Next**, **Svelte**, **Vue**, as well as **SASS**, **Tailwind**, and **Bootstrap**, but the scale of my projects usually allows me to work efficiently with plain HTML, modern CSS, and direct **DOM** manipulation using JavaScript.

During my studies, I've practiced test-driven development, and wrote tests for **REST API's**, Node backends, React frontends, and end-to-end testing using **Playwright**.

Currently, I'm learning **C++** and **JUCE** and have started developing plugins and applications for audio and media production.

WORK EXPERIENCE

Freelance - Web Developer

2024 - Ongoing   Stockholm, Sweden
- Creating and maintaining performant and responsive websites for business clients.
- Designing the UI/UX from scratch while focusing on the client's vision and brand identity.
- Following all WCAG guidelines for accessibility and optimizing for SEO.

VING - Sound & Light Engineer

March 2024 - October 2024   Crete, Greece
- Responsible for sound and lighting during children's and family shows.
- Managed all audio equipment at the hotel and collaborated with both Nordic and Greek teams.
